

COMMUNICATION SUPPORT GROUP

Are you or your loved one
having difficulty communicating?

This support group is designed for people having difficulty with communication resulting from stroke, traumatic brain injury, Parkinson's Disease, Amyotrophic Lateral Sclerosis (ALS), Multiple Sclerosis, or other neurological disease.

The group is open to family members and care providers too!
The intent is to connect and collaborate with others in the
community with similar challenges.

The group is run by two Speech-Language Pathologists (SLP)
whose careers have been devoted to treating adults with
speech-language and swallowing disorders.
